PROFILE

I am a passionate and detail-oriented Front-End Developer with a strong foundation in HTML, CSS, and JavaScript. I specialize in creating responsive, user-friendly web interfaces that combine functionality with visually appealing designs. Known for my creative problem-solving skills, I excel at turning complex concepts into seamless digital experiences With adaptability as a key strength, I thrive in dynamic environments, embracing new technologies and methodologies to deliver high-quality projects.

EDUCATION

Bachelor of Computer Science   10/2020 – 07/2024
Faculty of Science   Benha, Egypt

Graduation project : Memory mate
Application to help Alzheimer's patients(Flutter)
Grade : Excellent

CERTIFICATES

Front-End Developer
National Telecommunication
Institute (NTI)

SKILLS

Programming languages
c++
python
c#

Core Concept
Data Structure
Algorithms
OOP
Database Design
Design Patterns

Front-End Development
HTML
HTML5
CSS
CSS3
JavaScript
Bootstrap

PROJECTS

E-Commerce   12/2024 – 01/2025
Developed a fully responsive e-commerce web application using HTML5, CSS3,
JavaScript, Bootstrap,Stripe with the purpose of providing a seamless online
shopping experience. The
application aims to facilitate product discovery, streamline the purchase process, and
enhance user engagement through intuitive UI components. Implemented Redux for
efficient state management, enabling features like add-to-cart functionality,
favorites
management, and a shopping cart that automatically calculates total quantities and

amounts.

My Portfolio
This project is used to display a group of projects that any person accomplishes in general, and the skills used in this are beautifully explained in each project. I am considered the one who compiled this design through many Portfolios, I designed this
using the technologies used in web design, such as HTML5, CSS3 , JavaScript

Soft Skills
Team Leadership
Team Worker
Analytical Thinking
Management
Active Learning
